

Important Notice - Building Permit Information

Introducing our new Building, Electrical, Plumbing and Gas Permit Provider:
Park Enterprises Ltd.

As of August 01, 2016 the Town of Turner Valley is pleased to announce that Park Enterprises Ltd., will handle all your permitting needs. Park Enterprises has a solid history of 20+ years in providing great customer service and the Town is excited to bring their expertise to Turner Valley.

The Safety Codes Act requires that all contractors and homeowners in Alberta obtain permits prior to commencing work. A permit is required when construction, renovation, or addition is undertaken in connection with any building or plumbing, gas and electrical work. As a home owner you are able to obtain your own permits, or if you prefer a contractor can do this on your behalf. All contractors conducting work within the Town must have a business licence prior to commencing work. To obtain permits you will communicate directly with Park Enterprises Ltd. contact@parkinspections.com or call 1-800-621-5440 and they will be happy to handle your request. After your permits have been issued, Park Enterprises will take you through the inspection process. You are able to make inspection requests online at <http://parkinspections.com/>.

The major benefits of obtaining a permit are knowing that the installation will conform to the safety standards that have been adopted under the Safety Codes Act and that the inspection(s) will be provided by certified safety codes officers. A copy of your permit is now often required for utility hookups, insurance purposes, and re-sale of your property.
